Imperial Oil Lubricants & Specialties

Mobil Delvac

Long-life Performance for your Engine and Powertrain

► Mobil Delvac 1 ESP 0W-40 Synthetic Engine Oil

- State-of-the-art lubricant technology delivers exceptional year-round performance
- Formulated for reliable cold-weather starts in sub-zero temperatures and safe cold-morning warm-ups with less risk of metal-to-metal contact
- Exceptional protection against engine wear, even under high-load conditions
- API-licensed CJ-4 for low-emission engines, including those with Diesel Particulate Filters (DPFs)

► Mobil Delvac 1 ESP 5W-40 Synthetic Engine Oil

- Promotes increased engine life, with the potential for extended oil drains and greater fuel economy
- Exceptional performance in low-emission engines, including those with Diesel Particulate Filters (DPFs)
- Superb cold-weather performance

► Mobil Delvac 1300 Super 10W-30 and 15W-40

- Extra-high performance formulation promotes extended engine life, even under severe conditions
- Meets or exceeds API CJ-4 and OEM performance requirements for late-model low-emission engines
- Recommended for a wide range of heavy-duty applications, on highway and off

► Mobil Delvac Synthetic Transmission Fluid 50

- Approved by major OEMs for extended warranties
- Reduced wear and longer gear life over conventional automotive transmission fluids through outstanding load carrying, antiwear and EP performance
- Excellent viscosity control for improved fuel economy and long equipment life

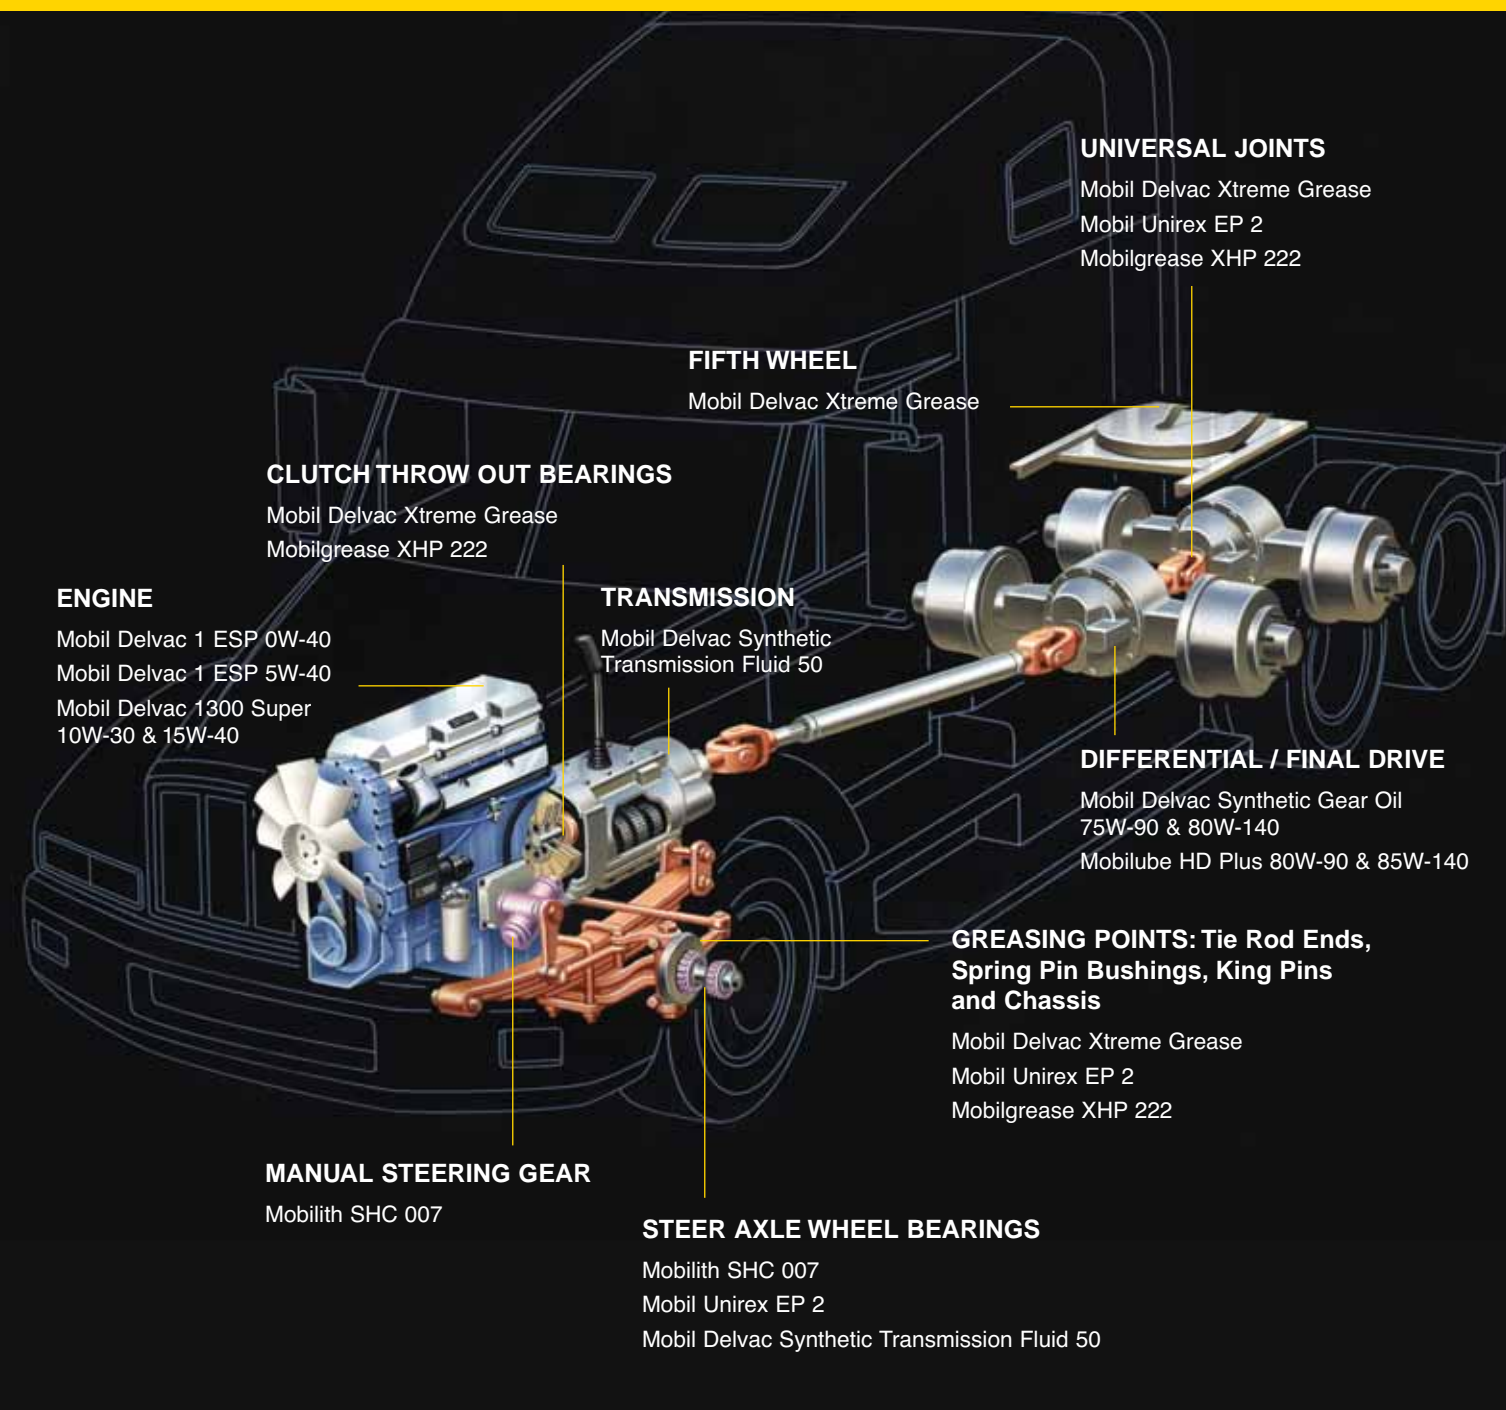

► Mobil Delvac Synthetic ATF

- Synthetic formulation includes SuperSyn, for peak performance even in severe operating conditions
- Outstanding gear shifting and power transfer
- Excellent performance at sub-zero temperatures

► Mobil Delvac Synthetic Gear Oil 75W-90 and 80W-140

- Approved by major OEMs for extended warranties
- Extended gear life due to high film strength and improved low-temperature properties
- Improved fuel efficiency over conventional automotive gear lubricants

Bumper-to-bumper recommendations for your truck

Outstanding Year-round Protection for Bearings and Bushings

► Mobilith SHC 007

- Synthetic basestock fluids deliver excellent low-temperature pumpability and very low starting and running torque
- Lithium complex thickeners provide excellent adhesion, structural stability and resistance to water
- Extended service intervals with regular fill level and maintenance inspections

► Mobil Unirex EP 2

- Exceptional resistance to water washout and sprayoff; water resistance also helps resist ice formation in bearings on cold overnight stops
- Excellent performance at high and low temperatures; dependable low-temperature torque keeps bearings rolling freely, even on severe cold-morning start-ups
- Outstanding cohesive qualities hold the grease together for long-term protection
- Carries National Lubricating Grease Institute (NLGI) designation as a GC-LB grease
- Powerful resistance to corrosion
- Ideal for a wide range of mobile equipment, including Canadian road-transport vehicles in severe service

► Mobil Delvac Xtreme Grease

- Excellent resistance to wear and water intrusion
- Excellent stay-in-place properties at high temperatures and under high loads
- High performance with up to 30,000-mile service intervals

► Mobilgrease XHP 222

- Ideal for general chassis lubrication
- Excellent rust and corrosion protection
- Extended life in high-temperature service

Original Equipment Manufacturer (OEM) approvals on these Mobil lubricants

All of the Mobil products in this folder meet industry or major OEM requirements.
